EXPERIENCE

AMA Legal Solutions | UX/UI Designer **Sept 2025 – Present**

Gurugram, Haryana

- Designed and delivered **AMA Connect**, India's first pro bono free legal-aid app end-to-end (user flows, wireframes, high-fidelity UI in Figma), enabling users to get legal queries resolved by verified lawyers within 45 minutes.
- Designed the **Case Desk** feature, allowing users to track real-time case status and chat directly with their assigned lawyer, improving user engagement and app retention.
- Grew AMA Connect to **2,500+ active users** with a **4.9★ rating (13 reviews)** on both Play Store and App Store through iterative, user-centred design.
- App recognised and featured on **Bar & Bench**, India's leading legal industry publication, strengthening brand credibility and user trust.
- Redesigned **10+ company and client websites**, applying user-centred design principles that increased user traffic by an estimated 30–40% and improved user satisfaction and conversion rates.
- Currently designing and developing responsive websites end-to-end (last 1 month), using AI-assisted coding tools (Cursor, Google Antigravity) to accelerate design-to-development handoff.
- Designed, built, and launched **10+ Shopify e-commerce stores** for internal and client brands, covering UX, storefront design, and conversion-focused layouts.
- Manage AMA Legal Solutions' social media handles end-to-end, growing total page views by **12,000+** through consistent visual content and design.
- Collaborate closely with product managers and engineers in an Agile environment, translating research insights and business requirements into actionable design solutions.

[DroDro] | UX/UI Designer Intern **May 2025 – Aug 2025**

Noida, Uttar Pradesh

- Designed the complete website and app experience end-to-end, from wireframes and user flows to high-fidelity UI, using Figma.
- Applied user-centred design principles to create an intuitive product experience for early-stage users of the platform.
- Collaborated with founders and the engineering team to translate business requirements into clear design specifications.

TECH STACK & TOOLS

Design: Figma (Prototyping, Auto-layout, Components, Design Systems), Jitter, Rive, Adobe Illustrator, Adobe After Effects, Canva

AI-Powered Design & Dev: Google Stitch, Google Flow, Google Antigravity, Cursor, Claude (code iteration & documentation)
